

AIRSPACE WORLD 2026

26-28 MAY 2026
LISBON, PORTUGAL

SHAPING OUR FUTURE SKIES

EXHIBITOR
PROSPECTUS

A large, curved, purple CANSO booth structure dominates the upper half of the image. The word 'CANSO' is written in large, white, sans-serif capital letters across the top of the curve. Below the main structure, several vertical purple banners also feature the 'CANSO' logo and the tagline 'SHAPING OUR FUTURE SKIES'. In the foreground, a man and a woman are seated at a white circular table, engaged in conversation. The man is holding a smartphone. On the table are two coffee cups and a blue folder. In the background, other attendees are visible, and the overall atmosphere is that of a busy trade show or conference.

AIRSPACE WORLD 2026

As the third edition of Airspace World concluded in Lisbon, it was clear that this event has firmly established itself as the premier global platform for the entire airspace management community.

Year after year, we continue to attract senior decision-makers and high-level engagement. The 2025 edition welcomed an exceptional number of C-Level participants, a strong representation from ANSPs and government bodies, and a high proportion of attendees with purchasing authority. Our reimagined Executive Summit once again brought together some of the most influential voices shaping the future of aviation.

One of the standout themes of Airspace World 2025 was the inclusive, forward-thinking dialogue on the future of our skies. From uncrewed aviation and UTM to AAM, AI, and sustainability, conversations across the event reflected the urgency and the opportunity shaping our industry's next chapter.

Some key highlights from this year's event:

- 90% of exhibitors and sponsors reported achieving their primary objectives for participation, with many already confirmed for 2026.
- 70% of attendees held purchasing authority, with exhibitors reporting a high volume and strong quality of sales leads.
- 2,000 ANSP leaders joined us from across the globe, making this the largest gathering of ANSPs worldwide.

Looking ahead to 2026, we are excited to return to the Lisbon Exhibition and Congress Centre – an ideally located venue in one of Europe's most vibrant cities. With momentum on our side, we fully expect to continue growing the quality and quantity of participation.

We invite you to participate in this dynamic, global conversation and to join us in shaping the future of airspace.

Warm regards,

Mike Treacher

MEETING THE NEEDS OF EXHIBITORS

Exhibitor aims at Airspace World 2025

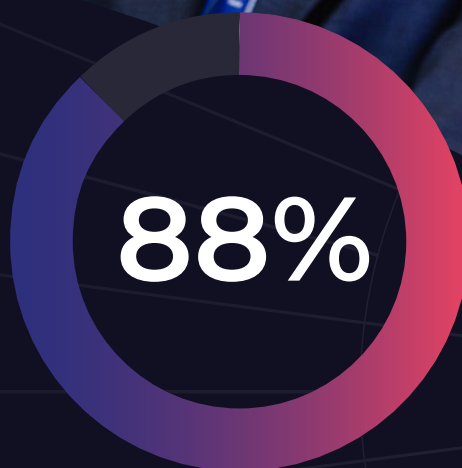

The 2025 edition of Airspace World in Lisbon provided Frequentis with an outstanding opportunity to connect with customers and partners, and to showcase our strategic focus areas. The event's well-curated format, focused audience, and professional organisation enabled us to present not just concepts, but real, operational solutions that are already shaping the future of air traffic management. We greatly value the collaboration with CANSO and look forward to building on this momentum in the years to come."

Why Attendees Came to Airspace World 2025

Attendees at Airspace World 2025 represented a highly engaged and purposeful audience. Their reasons for attending reflect a strong appetite for knowledge, connection, and commercial opportunity within the global airspace ecosystem.

Top reasons cited by attendees included:

85%
**attended to
develop market
intelligence**

90%
**came to meet
new partners and
suppliers**

82%
**were focused
on discovering
industry trends**

88%
**aimed to discover
the latest products
and solutions**

78%
**sought to meet
existing partners
and suppliers**

These insights confirm Airspace World's position as a critical marketplace for learning, networking, and innovation.

MEET THE ORGANISER

CANSO IS THE GLOBAL VOICE OF THE AIR TRAFFIC MANAGEMENT INDUSTRY.

With CANSO's members supporting almost 90 per cent of world air traffic, CANSO is the global voice of air traffic management (ATM). Join today to help shape the future of a safe, efficient and seamless airspace.

BE INNOVATIVE

Showcase how your technology can help the industry

BE HEARD

Participate and help shape an industry

BE CONNECTED

Take advantage of CANSO events and connect with thousands of delegates

BE INSPIRED

Take the opportunity to offer new ideas and approaches to common challenges

WHO

we are

CANSO is the global and regional voice of air traffic management (ATM) and facilitates and supports improvements in global and regional ATM performance.

With its members supporting almost 90 per cent of world air traffic, CANSO brings the world's air navigation service providers, leading industry innovators and air traffic management specialists together with governments, regulators and key stakeholders to share knowledge, develop best practice and shape the future for secure and seamless airspace.

WHAT

we do

Together the CANSO community seeks to:

- Maintain an international network for air navigation services (ANS) experts to exchange information and ideas on the safe, efficient and effective management of airspace.
 - Develop distinct policies and positions for the promotion of best practice within ATM.
 - Liaise with other air transport industry stakeholders, particularly regulators, airlines, industry suppliers and airports to promote the ANSP perspective across the range of contemporary issues in the industry.
 - Represent the views and interests of members at relevant international institutions, particularly the International Civil Aviation Organization (ICAO), and promote and support international legislation, regulations and agreements that strengthen the position of our members.
-

WHY

we do it

The ATM industry has a vital role to play in the aviation value chain and by working together, CANSO Members are able to harness the power of partnership, new technologies and procedures, transforming global ATM performance and delivering significant benefits to our industry partners and stakeholders.

HOW

we do it

The ATM industry is changing rapidly and fundamentally constantly evolving. As a result, all stakeholders are taking on a range of new tasks and responsibilities. They are preparing for a new generation of ATM technologies and major changes to the number and type of operations they support. Meanwhile, international aviation regulatory bodies are preparing important new rules and procedures that will directly impact ATM operations.

CANSO shapes the future of ATM through close partnership with ICAO, States, industry associations and other stakeholders at a global, regional and national level, maintaining a strong presence for the industry, advocating its interests, delivering on commitments, and driving and supporting change in ATM.
